Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 August 2000.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 08/09/2000 (Listing US. serial number 09/155748 filed on October 5, 1998) fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3¹⁶ are rejected under 35 U.S.C. 102(e) as being anticipated by Rijckaert
1
(US6222981).

Regarding claims 1 and 6 Rijckaert shows a reproducing device 140 (fig. 14) including:

- Transport means 250 (fig.14) (col.27 ll.3-5)

Art Unit: 2613

- Reproducing means (col. 27 ll.1-15)
- Test means 270 (fig.14) (col.27 ll.56-67)

Regarding claim 2 Rijckaert shows that the reproducing means are adaptable to the DVHS standard (col.1 ll.47-49)

Regarding claim 3, Rijckaert shows that the second tick=play speed corresponds to +/- 12 times the normal play speed (col.3 ll.49-51)

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Higurashi(US6031679) in view of Rijckaert (US6222981).

Rijckaert teaches a reproducing device with a magnetic tape having a normal play speed, but does not specify a value for the normal play speed. A reproducing device with a normal play speed of 16.67mm/s is shown in Higurashi (col.13 ll.61-67). It would have been obvious to one of skill in the art to specify the value of the normal play speed of magnetic tape through a reproduction apparatus.

Allowable Subject Matter

Claims 5 and 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Wu et al. (US5615018)

Higurashi et al. (US6191900)

McLaren (US6122433)
